# 1. Introduction

Welcome to HustleOS

HustleOS is a cutting-edge Linux distribution based on Ubuntu 24.04.1, designed for creators, developers, and everyday users.

HustleOS offers a blend of performance, security, and customization, making it ideal for those who need a fast, reliable, and highly configurable operating system.

Whether you are new to Linux or a seasoned user, HustleOS provides all the tools you need for a smooth experience.

This manual will guide you through the installation, features, customization options, and basic system administration tasks.

## 2. Getting Started

System Requirements

Before installing HustleOS, make sure your system meets the following requirements:

- Processor: Intel or AMD processor (64-bit recommended)
- RAM: 2GB or more (4GB recommended)
- Storage: 10GB free disk space (20GB or more recommended for optimal performance)
- Graphics: Any modern graphics card (supporting open-source drivers)
- Display: Minimum resolution of 1024x768

## Installation Guide

HustleOS can be installed from a USB drive or DVD. Here's how:

### 1. Download the ISO:

- Go to the official HustleOS download page and download the latest ISO image.

### 2. Create a Bootable USB:

- Use tools like Rufus (Windows) or Startup Disk Creator (Linux) to create a bootable USB drive from the downloaded ISO file.

### 3. Boot from the USB:

- Insert the USB drive into your computer and restart.
- Enter the BIOS or UEFI settings and set the USB drive as the first boot option.

### 4. Install HustleOS:

- Once the system boots, you will be presented with the HustleOS installation screen.
  - Choose your language, keyboard layout, and follow the on-screen instructions to install HustleOS.
- Select the partition to install the system, and proceed with the installation.

### 5. Complete the Setup:

- After installation, reboot the system. HustleOS will now be ready to use.

## 3. Key Features

### User Interface

HustleOS uses a clean and modern interface based on GNOME (with custom HustleOS tweaks).

The design prioritizes efficiency and ease of use.

- Top Bar: Contains the system menu, network status, time, and access to the settings.
- Application Menu: Access all installed applications and utilities from here.
- Dock: Quickly access your most-used applications.

## Performance and Speed

- Optimized for Speed: HustleOS is designed for fast boot times and quick application launches. It uses lightweight tools and efficient resource management.
- System Monitoring: Integrated system monitors give you insight into CPU, RAM, and disk usage.
